## Takeover By Spies Charged

BY DAVE ANDERSON  
Free Press Staff Writer

The National Caucus of Labor Committees, a leftist splinter group, held a press conference in Highland Park Thursday to announce the discovery of what their spokesmen say is a plot by American, British and Soviet spies, aided by the New York Police Department, to "take over" the United States and Western Europe. They provided many details but scant proof.

A spokesman said the group is currently asking a judge in New York to enjoin the takeover and further prevent the police from arresting committee members — particularly those who have been "brainwashed."

The plot was uncovered, according to the group's spokesmen, after a number of their members were revealed to have been brainwashed by British intelligence operatives on subcontract from the CIA.

THE ALLEGATIONS of a worldwide plot are being taken at least somewhat seriously in New York where police arrested six young members of the communist anti-Soviet group. They have been charged with kidnapping one of their own members, a woman who had been allegedly "brainwashed."

The press conference was called in Detroit, spokesmen said, because the CIA had ordered newspaper editors and TV news directors in New York to suppress the information.

The committee's leaders said that anyone discrediting the plot or the brainwashing "is willfully doing the work of the CIA." The CIA had no comment.

David Suarez, a member of the Detroit chapter of the NCLC, said a national commission of inquiry has been formed to investigate and expose the plot to take over the Western world.

"What we can't stand," he said, "is crackpots who refuse to consider our evidence."

Suarez added that when the NCLC has solved this problem its next project will be to bring a worldwide halt to the practice of psychiatry and psychology.
